In reference to XM Radio (any satellite radio). The NAB seems to be motivated by greed in the case of petition 04-160. XM provides a quality product and service to its customers, otherwise people would not pay for it. I am a personal trainer, my business depends on people being health oriented. Would it make sense for me to lobby against any dietary products, only because they are bad for MY business? This is obserd, as is NAB's petition. Please side with XM radio.
